NEUROSCIENCE & BIOBEHAVIORAL REVIEWS

VOLUME 2 NUMBER 1 SPRING 1978

CONTENTS

Ultrasonic communication of adult myomorph rodents. NYBY, J. and G. WHITNEY 1

Genetic mechanisms of drinking and feeding. RAMIREZ, I. and R. L. SPROTT 15

Early history of mammalian nerve regeneration. WEST, J. R. 27

Functional parallels between the neural and environmental antecedents of aggression. HUTCHINSON, R. R. and J. W. RENFREW 33

Dreams and hallucinations: A common neurochemical mechanism mediating their phenomenological similarities. JACOBS, B. L. 59

BOOK REVIEW 71

ANNOUNCEMENTS

Change of Title 73

June 7–9, 1978. Baltimore, Maryland. Eleventh Miles International Symposium 74

June 25–30, 1978. Zurich, Switzerland. Fourth Biennial International Symposium on Biological Research in Alcoholism 75

August 20–24, 1978. Dublin, Ireland. Ninth Congress of the International Society of Psychoneuroendocrinology 76

August 21–25, 1978. Boston, Massachusetts. Fifth World Congress on Psychiatric Surgery 77

September 4–9, 1978. Florence, Italy. Second European Neurosciences Meeting 78

NEUROSCIENCE & BIOBEHAVIORAL REVIEWS

VOLUME 2 NUMBER 2 SUMMER 1978

CONTENTS

Current status of cholecystokinin as a short-term satiety hormone. MUELLER, K. and S. HSIAO . . . 79

Brain mechanisms of amphetamine-induced anorexia, locomotion, and stereotypy: A review. COLE, S. O. 89

Patterns of brain monoamine activity and aggressive behavior. DARUNA, J. H. 101

Opioids and rewarding brain stimulation. ESPOSITO, R. U. and C. KORNETSKY 115

BOOK REVIEWS

Hockman and Bieger (Eds.): *Chemical Transmission in the Mammalian Nervous System.* KUTSCHER, C. L. 123

Miller, Sandman and Kastin (Eds.): *Neuropeptide Influences on the Brain and Behavior: Advances in Biochemical Psychopharmacology.* KUTSCHER, C. L. 125

Barker, Best and Domjan (Eds.): *Learning Mechanisms in Food Selection.* KUTSCHER, C. L. 127

ANNOUNCEMENTS

August 20–24, 1978. Dublin, Ireland. Ninth Congress of the International Society of Psychoneuroendocrinology 131

August 21–25, 1978. Boston, Massachusetts. Fifth World Congress on Psychiatric Surgery 133

September 4–9, 1978. Florence, Italy. Second European Neurosciences Meeting 135

NEUROSCIENCE & BIOBEHAVIORAL REVIEWS

VOLUME 2 NUMBER 3 FALL 1978

THE EFFECTS OF PROTEIN MALNUTRITION ON THE DEVELOPING CENTRAL NERVOUS SYSTEM IN THE RAT

P. J. Morgane, M. Miller, T. Kemper, W. Stern, W. Forbes, R. Hall,
J. Bronzino, J. Kissane, E. Hawrylewicz and O. Resnick

CONTENTS

General Introduction 137
Malnutrition and the Brain 138
Brain Growth and Undernutrition 140
Aspects of Rehabilitation: Recovery of the Undernourished Brain 140

Methods 142
Breeding of Protein Malnourished Animals at the Worcester Foundation for Experimental Biology 142
Growth and Feeding 144

Neuroanatomical Studies 148
Effect of Malnutrition on Brain Weight and Configuration 149
Relative Size of Different Parts of the Brain 151
Regional Development of the Brain 152

Neurochemical Studies 161
Ontogeny of Biogenic Amine Metabolism in Brain and Peripheral Tissues in Protein Malnourished Rats 161
Tryptophan Availability for Indole Synthesis in Protein Malnourished Rats 163
Protein Synthesis and Malnutrition During Development 166
Developmental Utilization of Phenylalanine in Brain and Peripheral Tissues of Protein Malnourished Rats 168
Brain and Peripheral Utilization of Tryptophan in Developmentally Protein Malnourished Rats 171

Molecular Neurobiological Studies 174
Brain Mitochondrial Oxidation and Phosphorylation 174
Brain Adenine Nucleotide Concentrations 175
Isoenzymes of Brain Lactic Acid Dehydrogenase 176
Sodium-Potassium Stimulated Adenosine Triphosphatase Activity in Nerve-Ending Particles 180
Enzymes Related to Neurotransmitter Synthesis and Degradation and to Cyclic Nucleotide Control 184

Neurophysiological Studies 185
Evoked Potential Ontogeny 185
Seizure Susceptibility 188
Sleep 190
An EEG Power Spectral Atlas for the Developing Rat 194

Neurobehavioral Studies 212
Neuropharmacological Indices of Altered CNS Functioning in Protein Malnourished Rats 212
Performance on a Learning Task in Protein Malnourished Rats 214
Mother and Pup Behavior in Suckling Period 215

Reversal Studies 219

General Summary and Overview 219

References 221

NEUROSCIENCE & BIOBEHAVIORAL REVIEWS

VOLUME 2 NUMBER 4 WINTER 1978

CONTENTS

Molecular theory of obesity, sterility and other behavioral and endocrine problems in genetically obese mice (*ob/ob*). MARGULES, D. L. 231

The determinants of exploration and neophobia. COREY, D. T. 235

Bird orientation and the geomagnetic field: A review. OSSENKOPP, K-P. and R. BARBEITO 255

The insular region: Part of the prefrontal cortex? MARKOWITSCH, H. J. and M. PRITZEL 271

Response to the maternal pheromone in the rat as protection against necrotizing enterocolitis. MOLTZ, H. and S. J. KILPATRICK 277

The ontogeny of feeding and drinking: Effects of early brain damage. ALMLI, C. R. 281

An analysis of the variance in meal patterning. DE CASTRO, J. M. 301

Behavioral influences of the neuropeptides ACTH and MSH: A methodological review. BECKWITH, B. E. and C. A. SANDMAN 311

Food motivation in hypothalamic hyperphagic rats reexamined. SCLAFANI, A. 339

A theory of behavior, based on "rest principle" control of the strength of neural connections. SINCLAIR, J. D. 357

ANNOUNCEMENTS

January 24–26, 1979. Philadelphia. Biological and Behavioral Aspects of Salt Intake. 367

April 11–12, 1979. Dallas. International Symposium on Fever. 368

April 18–20, 1979. Brindisi, Italy. European Society for Neurochemistry. Multidisciplinary Approach to Brain Development. 369

May 7–9, 1979. Bethesda. International Peptide Symposium. 370

Fellowship in Nutrition. 371

AIMS AND SCOPE

NEUROSCIENCE & BIOBEHAVIORAL REVIEWS will publish original major reviews of the literature in anatomy, biochemistry, embryology, endocrinology, genetics, pharmacology, physiology, and all aspects of biological sciences when the relevance to problems of the nervous system or the investigation of behavior is clearly established. We will also publish articles where the primary emphasis is on behavior when the material is clearly significant and germane to one of the other fields. Theoretical articles where the major emphasis is on the biological determinants of behavior will be considered. Mini reviews where the scope and literature coverage are more restricted will be published. Solicited book reviews will also be included. Articles will be published in English and all manuscripts should be submitted to the Editor-in-Chief.

INSTRUCTIONS TO AUTHORS

Manuscripts should be sent to the Editor-in-Chief who will assign them to one of the editors for evaluation and a decision concerning acceptability.

STYLE OF MANUSCRIPT

General Form. (1) Manuscripts should be submitted in duplicate and should be typewritten, double spaced with wide margins on good quality paper. (2) The title page should contain: title of paper; author(s); laboratory or institution of origin with city, state, zip code, and country; complete address for mailing proofs; a running head not to exceed 50 characters including spaces between words. (3) References, footnotes, and legends for illustrations should be typed on separate sheets, double spaced. (4) Illustrations (unmounted photographs) should be identified on the reverse with figure number and author(s) name; when necessary the top should be clearly marked. (5) Each table should be typed on a separate sheet and double spaced. (6) All dimensions and measurements must be specified in the metric system. Standard nomenclature, abbreviations and symbols, as specified by Royal Society Conference of Editors. Metrication in Scientific Journals, *Am. Scient.* **56:** 159–164, 1968, should be used throughout. (7) Italics should not be used for the purpose of emphasis.

Title. The title should not be longer than 85 characters, including spaces between words.

Papers in a series such as: "Studies on . . . I." will not be accepted.

Length of Paper. The Editors insist upon clear, concise statement of facts and conclusions. Fragmentation of material into numerous short reports is discouraged.

Abstract. Each paper submitted must be accompanied by an abstract, which does not exceed 170 words and must be suitable for use by abstracting journals. Abstracts should be prepared as follows:

MYERS, R. D., C. MELCHIOR AND C. GISOLFI. *Feeding and body temperature: Changes produced by excess calcium ions . . .* BRAIN RES. BULL. Marked differences in extent of diffusion have been . . .

A list of from 3–12 (or more) words or short phrases suitable for indexing terms should be typed at the bottom of the abstract page accompanying the manuscript. These terms will be printed with the paper at the end of the abstract.

Drugs. Proprietary (trademarked) names should be capitalized. The chemical name should precede the trade, popular name, or abbreviation of a drug the first time it occurs.

Footnotes. Title page footnotes should be numbered consecutively. Text footnotes should not be used, the material should be incorporated into the text. Table footnotes: see *Tables* (b).

References. Literature cited should be numbered in brackets in text (only one reference to a number) and listed in alphabetical order on a separate sheet at the end of the manuscript. *Do not recite names of authors within the text.* Journal citations in the reference list should contain the following: (a) surnames and initials of all authors (surname of first author precedes initials; initials precede surnames of all co-authors); (b) title of article; (c) journal title abbreviated as listed in the 4th edition of the *World List of Scientific Periodicals;* (d) volume, inclusive pages, and year. Example:

1. Abrams, R. and H. T. Hammel. Hypothalamic temperature in unanesthetized albino rats during feeding and sleeping. *Am. J. Physiol.* **206:** 641–646, 1964.

Book references should be in the following order: author, title, city of publication, publisher, year, and pages Example:

1. Thompson, T. and C. R. Schuster. *Behavioral Pharmacology.* Englewood, New Jersey: Prentice-Hall, Inc., 1968, p. 297.

Citations such as "Unpublished observations," "Personal communication," "Manuscript in preparation," "To be published," should not be entered in the list of References, but may be noted in the text without serial numbers, in parentheses.

Illustrations. (a) Prepare for use in a single column width whenever possible. (b) All drawings for reduction to a given size should be drawn and lettered to the same scale. (c) All illustrations should be referred to as figures and numbered in Arabic numerals. (d) Lettering should be done in India ink or other suitable material and must be proportionate to the size of the illustrations if it is to be legible after reduction. Lettering should be sized so that its smallest elements (subscripts or superscripts) will be readable when reduced. (e) When possible all lettering should be within the framework of the illustration; likewise the key to symbols should be on the face of the chart. The following standard symbols should be used as they are easily available to the printer. ○ ● △ ▲ □ ■ + (f) Actual magnification of all photomicrographs should be given. Dimension scale should be indicated. (g) Sharply contrasting unmounted photographs of figures on glossy paper are required.

Tables. (a) Each table should have a brief heading; explanatory matter should be in footnotes, not as part of the title. (b) Table footnotes should be indicated in the body of the table in order of their appearance with the following symbols: * † ‡ § ¶ # **, etc. (c) Tables must not duplicate material in text or illustrations. (d) Vertical rules should be omitted. (e) Short or abbreviated column heads should be used. (f) Statistical measures of variation, SD, SE, etc., should be identified. (g) Analysis of Variance Tables should not be submitted but significant F's should be incorporated where appropriate within the text. The appropriate form for reporting F values is: $F(11,20) = 3.05$, $p<0.01$.

Formulas and Equations. Structural chemical formulas, process flow-diagrams, and complicated mathematical expressions should be kept to a minimum. Usually chemical formulas and flow-diagrams should be drawn in India ink for reproduction as line cuts.

All subscripts, superscripts, Greek letters, and unusual characters must be clearly identified.

Anesthesia. In describing surgical procedures on animals, the type and dosage of the anesthetic agent should be specified. Curarizing agents are not anesthetics; if these were used, evidence must be provided that anesthesia of suitable grade and duration was employed.

Proofs. Corrections to the proofs must be restricted to printer's errors only. Other than these, any other alterations will be charged to the author.

Reprints. Each author will receive with his galley proofs a reprint order form which must be completed and returned with the proofs. Late orders cannot be filled since reprints are run at the time the Journal is printed. Senior author receives 25 reprints free.
